Nombre del Grupo de investigación asociado a AIHUB:

Instituto de Investigación en Inteligencia Artificial (IIIA-CSIC)

Ubicación del centro donde se disfrutará la beca:

Instituto de Investigación en Inteligencia Artificial (IIIA-CSIC)

Campus Universitat Autònoma de Barcelona

08193 Bellaterra, Catalonia, Spain

Título del proyecto:

Towards an AI based labour union advisor

Descripción del proyecto (máximo dos párrafos)

The work to be performed in this JAE intro is in the context of a collaboration with the labour union CCOO and a forthcoming industrial PhD between the IIIA and CCOO.

The main goal of the proposed JAE intro is to analyse the different kind of documents, information, and processes that the labour union CCOO uses in the task of counselling workers that have labour conflicts or any kind of employment consultation. Currently, the labour union has a web page that offers different kind of information in the form of documents and videos. We plan to improve that service using a specialized bot that uses the latest AI techniques to provide advice in different situations. The work to be performed during the JAE is the first step towards this ultimate goal and will consist of analysing and preparing (from a computational perspective) the information that the bot will use. This will imply learning and understanding some of the AI techniques that will be used to build the bot.
